Interim Report 2009*

# CHAIRMAN'S STATEMENT

## FINANCIAL HIGHLIGHTS

- Turnover: HK\$938 million (2008: HK1,322 million).
- Profit attributable to shareholders: HK\$16 million (2008: HK\$124 million).
- Interim dividend per share: 1 HK cent (2008: 12 HK cents).
- We remain committed to high-end display products, and are well-positioned to participate in a global economic recovery.

On behalf of Varitronix International Limited (the "Company") and its subsidiaries (collectively "Varitronix" or the "Group"), I present the Group's results for the period ended 30 June 2009.

During the period under review, turnover was HK\$938 million, a 29% decrease as compared to HK\$1,322 million recorded in the same period last year. Profit from operations was HK\$39 million and profit attributable to shareholders was HK\$16 million, a decline of 73% and 87% respectively as compared to the corresponding period in 2008.

The Board of Directors (the "Board") has recommended an interim dividend of 1 HK cent (2008: 12 HK cents) per share.

## BUSINESS REVIEW

Market conditions during the first six months of 2009 have been more challenging than the corresponding period in 2008. As a result of the adverse effects of the global financial crisis, many of the Group's customers have scaled down production in the wake of weakening consumer demand. In turn, our performance has been negatively impacted.

Turnover in the first quarter of 2009 continued the decline posted from the fourth quarter in 2008, particularly in the months of January and February. Business began to show signs of recovery in March and started to stabilize in the second quarter of the year. Since then, there has been a steady upward trend in monthly turnover.

The automotive and high-end industrial display businesses in Europe and America have softened in the first half of this year. As both of these sectors have always been key profit contributors for the Group, their decline has resulted in a drop in our overall profitability.

While automotive displays have always been one of our core businesses, sales in traditional automobile markets, mainly in Europe, have suffered major setbacks from the fourth quarter in 2008 onwards, and are yet to return to former levels. However, sales of automotive displays in the Asian region have remained stable, with increased business activity recorded from the second quarter of 2009.

Since the beginning of 2008, business from the Mainland mobile phone market has slowed down. Such conditions persisted in the first half of this year as demand and prices for these displays have continued to decline and operating risks are gradually increasing. The Group has adopted a conservative strategy to deal with this business.

During the period under review, many of our traditional customers in the European and North American industrial and home appliance sectors have concentrated on clearing inventory, rather than placing new orders. However, we have been able to secure orders from new customers in North America to maintain sales.

## CHAIRMAN'S STATEMENT

### PROSPECTS

The Group has renewed confidence in the business prospects for the second half of 2009 due to the following factors:

1. There are signs of recovery in the global economic environment, with North America reporting improvements in key economic data. In the past few months, customers were halting their purchasing activities or putting off orders to transfer risks to suppliers. We now see our customers in Europe and North America resuming placement of new orders.
2. During the economic downturn, the Group has remained committed to R&D for our high-end display products. To increase competitiveness, we have actively pursued design improvements for our products. We are confident that our efforts will satisfy the needs of our customers and enhance our market positioning.
3. Amidst recent challenging times, we have seized the opportunity to reallocate resources and restructure our organization by integrating our production and design facilities in Heyuan, Guangdong Province, PRC. These initiatives have enabled us to streamline our organization and operating costs. In addition to the increased production capacity provided by the new production line, the Group is in a good position to expand our market share as business sentiments improve.
4. The Group has dedicated significant efforts to nurturing our businesses in emerging markets, including the automotive and consumer product sectors. These emerging markets have been less affected by the economic turmoil than Europe and North America, acting as a

buffer when business from the traditional markets has declined. The Group will continue to develop emerging markets, such as Mainland China and South Korea.

#### **Mainland China Market – Automotive and Industrial Display Business**

The Mainland China market has tremendous potential, and the Group has established a sales network for consumer products in the Southern China region. Looking forward, the Group aims to capitalize on our strengths in the high-end display products to enlarge our market share in this particular sector.

Mainland China has now become a key automobile market in the world. Despite the global financial crisis, the Central Government's stimulus measures have spurred demand, and a rise in automobile sales was recorded in the first half of 2009.

The Group's existing automotive customers in Mainland China include joint venture companies between Chinese and foreign automobile manufacturers and other local car manufacturers, with the majority of such clients located in Shanghai and other neighbouring cities. We are confident that these two major customer groups still present many business opportunities for growth and greater efforts will be dedicated to develop the Shanghai market and other markets which show great potential, such as the Northeast and Central Western regions.

#### **Mainland China Market – Mobile Handset Business**

The demand for the mobile handsets in Mainland China has weakened since last year, but the competition amongst manufacturers remained fierce. This led to continuous declining selling prices for the mobile handset market. Therefore, the operating environment is risky. To address this, the Group has adopted

a conservative strategy and will review the overall business so as to devise a long-term strategy in due course.

### **South Korean Market**

The Group's business in South Korea has always been dominated by automotive and consumer product customers. Revenue generated in these sectors has shown a steady increase over the last few years. The South Korean automobile industry has weathered the global economic crisis very well and has successfully expanded their export markets in North America, Europe and Mainland China. This sector has created new momentum for growth in our automotive display business and we will devise a comprehensive plan to meet the demand from this market.

### **SUMMARY**

In the first half of the year, revenue from traditional customers has declined. However, orders from new customers have helped to maintain sales.

Signs of recovery in the global economy have surfaced in the beginning of the second half of the year and new orders have started to come in from our automotive customers in Europe. It is hoped that this recovery can be sustained.

Our priority is to fully prepare ourselves to ensure we can respond in a timely manner to the expected influx of orders from traditional customers and to capitalize on new opportunities that arise.

It is anticipated that overall sales revenue will gradually increase in the second half of the year. We should be able to reap the rewards of our efforts in rationalizing our production facilities and enhancing R&D of our high-end products made during the economic downturn.

### **ACKNOWLEDGEMENT**

With effect from 1 July 2009, Mr. Yuen Kin, an independent non-executive director of the Company, has been re-designated as an executive director of the Company and appointed as the Chief Financial Officer of the Group. Mr. Chau Shing Yim, David has been appointed as an independent non-executive director of the Company and a member of the Audit Committee of the Company. Their experience and professional expertise will prove invaluable to the Group and I would like to welcome them to their new positions.

I would also like to thank our customers, shareholders, directors and colleagues for their support and dedication. We will continue to strengthen ourselves to face the challenges ahead.

# NOTES TO THE INTERIM FINANCIAL REPORT

## 1. BASIS OF PREPARATION

This unaudited condensed consolidated interim financial report for the six months ended 30 June 2009 has been prepared in accordance with Hong Kong Accounting Standard (“HKAS”) 34, “Interim financial reporting”. The unaudited condensed consolidated interim financial report should be read in conjunction with the annual financial statements for the year ended 31 December 2008, which have been prepared in accordance with Hong Kong Financial Reporting Standards (“HKFRSs”).

## 2. ACCOUNTING POLICIES

Except as described below, the accounting policies adopted are consistent with those of the annual financial statements for the year ended 31 December 2008, as described in those annual financial statements.

The following new standards and amendments to standards are mandatory for the first time for the financial year beginning 1 January 2009 and relevant to the Group.

- HKAS 1 (revised), “Presentation of financial statements”. The revised standard prohibits the presentation of items of income and expenses (that is “non-owner changes in equity”) in the statement of changes in equity, requiring “non-owner changes in equity” to be presented separately from owner changes in equity. All “non-owner changes in equity” are required to be shown in a performance statement.

Entities can choose whether to present one performance statement (the statement of comprehensive income) or two statements (the income statement and statement of comprehensive income).

The Group has elected to present two statements: an income statement and a statement of comprehensive income. The unaudited interim financial statements have been prepared under the revised disclosure requirements.

- HKFRS 8, “Operating segments”. HKFRS 8 replaces HKAS 14, “Segment reporting”. It requires a “management approach” under which segment information is presented on the same basis as that used or internal reporting purposes.

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker has been identified as the Board of Directors (the “Board”) that makes strategic decisions.

The Group is mainly engaged in design, manufacture and sale of liquid crystal displays and related products. The internal reporting provided to the chief operating decision-maker is provided on a basis of geographical segment which is the same as previously reported, accordingly, the number of reportable segments presented is the same as the previously reported.

### 3. SEGMENT INFORMATION

The chief operating decision-maker has been identified as the Board. The Board reviews the Group's internal reporting in order to assess performance and allocated resources. Management has determined the operating segments based on these reports.

As the Group is mainly engaged in design, manufacture and sale of liquid crystal displays and related products, the Board considers the business from a geographic perspective.

The Board assesses the performance of the operating segments based on turnover which is consistent with that in the financial statements. Other information, as noted below, is also provided to the Board.

Total assets exclude deferred tax, available-for-sale financial assets, derivative financial instruments and interest in associates, all of which are managed on a central basis.

The provision for Hong Kong Profits Tax is calculated at the rate of 16.5% (2008: 16.5%) of the estimated assessable profits for the six months ended 30 June 2009. Taxation for overseas subsidiaries is charged at the appropriate current rates of taxation ruling in the relevant countries.

## 7. EARNINGS PER SHARE

### (a) Basic earnings per share

The calculation of basic earnings per share is based on the unaudited profit attributable to equity shareholders of the Company of HK\$15,811,000 (2008: HK\$124,140,000) and the weighted average number of 323,422,204 shares (2008: 323,422,204 shares) in issue during the period.

### (b) Diluted earnings per share

The calculation of diluted earnings per share is based on the unaudited profit attributable to equity shareholders of the Company of HK\$15,811,000 (2008: HK\$124,140,000) and the weighted average number of 323,422,204 shares (2008: 323,565,972 shares) after adjusting for the effects of all dilutive potential shares.
